

# Quant Vision's

## LEARNING RESOURCES

### I/ Learning To Use TradingView

---

- To begin with, we have chosen to introduce you to the TradingView platform, which we will use throughout the course.
- It is a very popular platform for traders and investors looking for knowledge about the financial markets.
- The platform allows you to get a real-time overview of stocks, currencies and cryptocurrencies.
- You'll learn about market trends with charts and visualization tools, but you can also keep up with the latest news in real time with a live news feed.

### **+ Here's the list of steps you'll need to take to view a stock price on TradingView:**

1. Go to the following link: [https://www.tradingview.com/?aff\\_id=125291&source=quant-vision](https://www.tradingview.com/?aff_id=125291&source=quant-vision)
2. Create an account
3. Click on "Product"
4. Click on "Chart"

*There you'll have it - your first stock price !*

## + Presentation of the interface:

- A good exercise that we recommend is to type random letters in the indicator tab, try and test several indicators and understand how they work.
- This approach will enhance your understanding of the diverse range of indicators available.
